

Seeking *VP of Engineering, Director of Engineering, CTO* — I bootstrap engineering organizations, establish technical governance, and deliver complex programs from zero to production. I combine deep technical fluency with business acumen to align engineering execution with organizational strategy.

Highlights

“ Program Delivery & P&L Ownership

- Delivered a \$93M state modernization program (go-live June 2025, 3,000+ users, 100 counties, 50+ repos, 30+ vendor products).
- Managed \$10M multi-year RFP (Yum! China), \$3M Fortune 500 RFP, \$2M ERP acquisition, and \$6M venture-funded research program.
- Won \$100M contract with architecture showcased at MWC Barcelona.

“ Organization Building & Team Leadership

- Built and led global engineering teams (5-20 direct/indirect) across US, China, India, spanning PM, UX, ML, Dev, QA, DevOps.
- Bootstrapped SDLC, DevOps culture, and engineering practices from zero at 5+ organizations (startup to government enterprise).
- Established architecture governance, release management, incident response, and quality frameworks for mission-critical systems.

“ Technical Strategy & Vendor Management

- Evaluated, selected, and managed 30+ SaaS/COTS products (Salesforce, MuleSoft, AWS, Azure, ROSA, AEM, Adobe Sign, OwnBackup, Splunk).
- Authored technology roadmaps driving multi-year execution.
- Led architecture decision processes with formal state/DIT review.
- Published reference architectures (Lenovo Press).

“ Stakeholder Management & Communication

- Direct reporting lines to CTO, State Chief Enterprise Architect, and DIT Enterprise Architecture.
- Managed vendor relationships (Deloitte, Red Hat, MuleSoft, Adobe).
- Authored and presented architecture knowledge base (87+ topics) for cross-functional team enablement.

“ Domain Expertise

- Government/Public Sector: child welfare, Medicaid, financial systems, FedRAMP/NIST compliance.
- Enterprise: cloud platforms, AI/ML, data engineering, identity, security, integration architecture.

Experience

- 12/2023** Department of Health and Human Service, North Carolina, Principal System Architect
- “ Led the technical delivery of the PATH NC (\$93M) child welfare modernization from architecture through successful statewide go-live (June 2025).

Managed the complete technology portfolio: 50+ repositories, 7 AWS accounts, 3 Azure subscriptions, 30+ licensed products, and a multi-cluster OpenShift platform serving 3,000+ users across all 100 NC counties.

- “ Established the program’s entire architecture governance from scratch: reference architecture, formal DIT/State architecture review decision points, custom code dev/build/deploy standards, SBOM and license compliance, backup & restore strategy, production incident management, and PROD health dashboards. Created the systematic framework that guided the project to on-time delivery.
- “ Managed vendor technical oversight (Deloitte as prime contractor): defined architecture standards, enforced code quality gates, reviewed and approved all technical deliverables, drove resolution of open topics and tech debts across all workstreams.
- “ Authored and maintained the architecture knowledge base (87+ infrastructure topics, 39+ Salesforce topics, 21+ DevOps topics) delivered as presentations, driving team-wide technical enablement and reducing knowledge silos.
- “ Orchestrated the phased county rollout strategy (6 groups, 15-22 counties each): user lifecycle management, NCID/Azure AD SSO provisioning, per-county role matrix (400+ roles), validation tooling, and go-live readiness checkpoints.
- “ Directed the technology selection and architecture for the GenAI platform: evaluated Kendra, Salesforce AgentForce, Microsoft Copilot; selected and delivered RAG solution (Bedrock Claude, OpenSearch Serverless) across 6 environments.
- “ Owned the integration architecture connecting PATH NC to 12 state and federal systems via MuleSoft API-led connectivity (13+ APIs): NCID, CNDS, DPI, FIS, NEICE, EB, ACTS, NCFS, Vital Records, Medicaid, Adobe Sign, DocuEdge.
- “ Drove the end-to-end financial data movement architecture (Salesforce → Azure → Synapse → Power BI → SFTP → NCFS mainframe) enabling monthly county payment processing for Foster Care, Vendor Payments, and Adoption Assistance.
- “ Led security and compliance: FedRAMP SSP documentation (NIST 800-53), secrets lifecycle management, network security (Direct Connect, Transit Gateway, Cloudflare WAF), and security scanning pipeline integration.

3/2022 - Lucidum, Principal System Architect

3/2023

- “ Led design of the next-gen product architecture, transforming on-prem-only model to hybrid cloud-native. Directed the successful migration of twelve production systems to AWS & Azure.
- “ Managed a global engineering team (PM, UX, ML scientist, developers, QA, DevOps) with direct reporting line to the CTO. Delivered 2 major releases, 6 minor releases, and 12 patch releases.
- “ Established GitOps practices, CI/CD pipeline architecture, security hardening (CVE scanning, secret management), and test automation (revamped 800+ E2E tests, achieved 100% UAT automation).
- “ As AWS and Azure administrator: owned cloud infrastructure strategy, cost management, and service configuration across the full stack.

- 11/2016**
- 3/2022 Lenovo US, P8, Advisory Engineer, Senior Solution Architect, Team Lead
- “ Led a global team of six, transforming the “*Lenovo Open Cloud Automation Reference Architecture*” from concept to market-ready product in 13 months. Showcased at MWC Barcelona 2019, won \$100M contract.
 - “ Authored the “*RedHat Hyperconverged Infrastructure (RHHI) Reference Architecture*”, a published solution design for 3-12 server deployments with HA, fault tolerance, and zero-touch provisioning.
 - “ As team lead of ThinkAgile CP, led a global team (5 UI/UX, 2 backends, 1 QA, 2 DevOps) delivering six production releases over two years for a hybrid cloud platform with AWS management plane.
 - “ Architected the “*Lenovo Workload Solution Store*”, serving as the core foundation of the ThinkAgile VX product line.
- 01/2015**
- 11/2016 PY Consulting, Founder, Freelance
- “ Bootstrapped engineering practices from zero at 5+ organizations:
 - “ *UNC Chapel Hill*: Initiated first Docker/CI/CD in production, authored DevOps technology roadmap, oversaw Phase 2 & 3 execution.
 - “ *Wei Fashion Group*: Designed and delivered first-gen ERP consolidating HQ and two global subsidiaries (US, Europe).
 - “ *Linkage*: Created “2016-17 Technology Roadmap”, established SDLC and development culture for the startup from the ground up.
 - “ *World Bank*: Built data-driven web application for the “Digital Development Partnership” program.
- 11/2013**
- 01/2015 Beijing Lean Strategy Consulting Group, Associate Director
- “ Full P&L ownership of a \$3M RFP with a Fortune 500 customer: business analysis, system design, development, deployment, maintenance, and human resource management.
- 07/2010**
- 11/2013 CrunchTime! Information Technology, Project Manager
- “ Managed \$10M multi-year RFP with Yum! China: requirement analysis, CRM, feature prototyping, deployment rollout across China, user training, and technical support.
 - “ Developed the Salesforce Customer Portal winning Bronze at the “2011 Steve Awards for Sales & Customer Service”.
- 04/2009**
- 04/2010 China Everbright Bank, Financial Leasing Division, Business Manager
- “ Owned \$2M RFP for core ERP acquisition. Led team of 4 business analysts and 5 engineers through evaluation and selection.
- 04/2004**
- 05/2007 Bit 9 Inc. (Carbon Black), Researcher, Tech Lead
- “ Led kernel security research that won \$6M Series A from Kleiner Perkins Caufield & Byers.
- 07/1998**
- 04/2004 Instron Corp., Senior Engineer
- “ Developed real-time firmware for industrial testing products.

Education

- “ *MBA (04/2007 - 09/2008)*, Boston Univ., International Management & Finance
- “ *Master of Science (09/1995 - 05/1997)*, Ohio Univ., Electrical Engineering
- “ *Bachelor of Science (09/1990 - 07/1994)*, Shanghai JiaoTong Univ., China, Electrical Engineering
